

Bogdan Carpusor

Full Stack Web Engineer, 8 years of experience

About

I'm a full stack web developer who can build apps from the ground up. I've worked mostly at small size companies, in agile environments, so I am use to wearing many hats. I am a very product focussed developer who focuses on fast iterations and user feedback.

Skills

Javascript

NodeJS

React

Redux

Python

Kubernetes

MongoDB

TypeScript

PostgreSQL

Redis

MySQL

Linux

REST

GraphQL

Nest.js

AWS

Worked on projects for companies such as

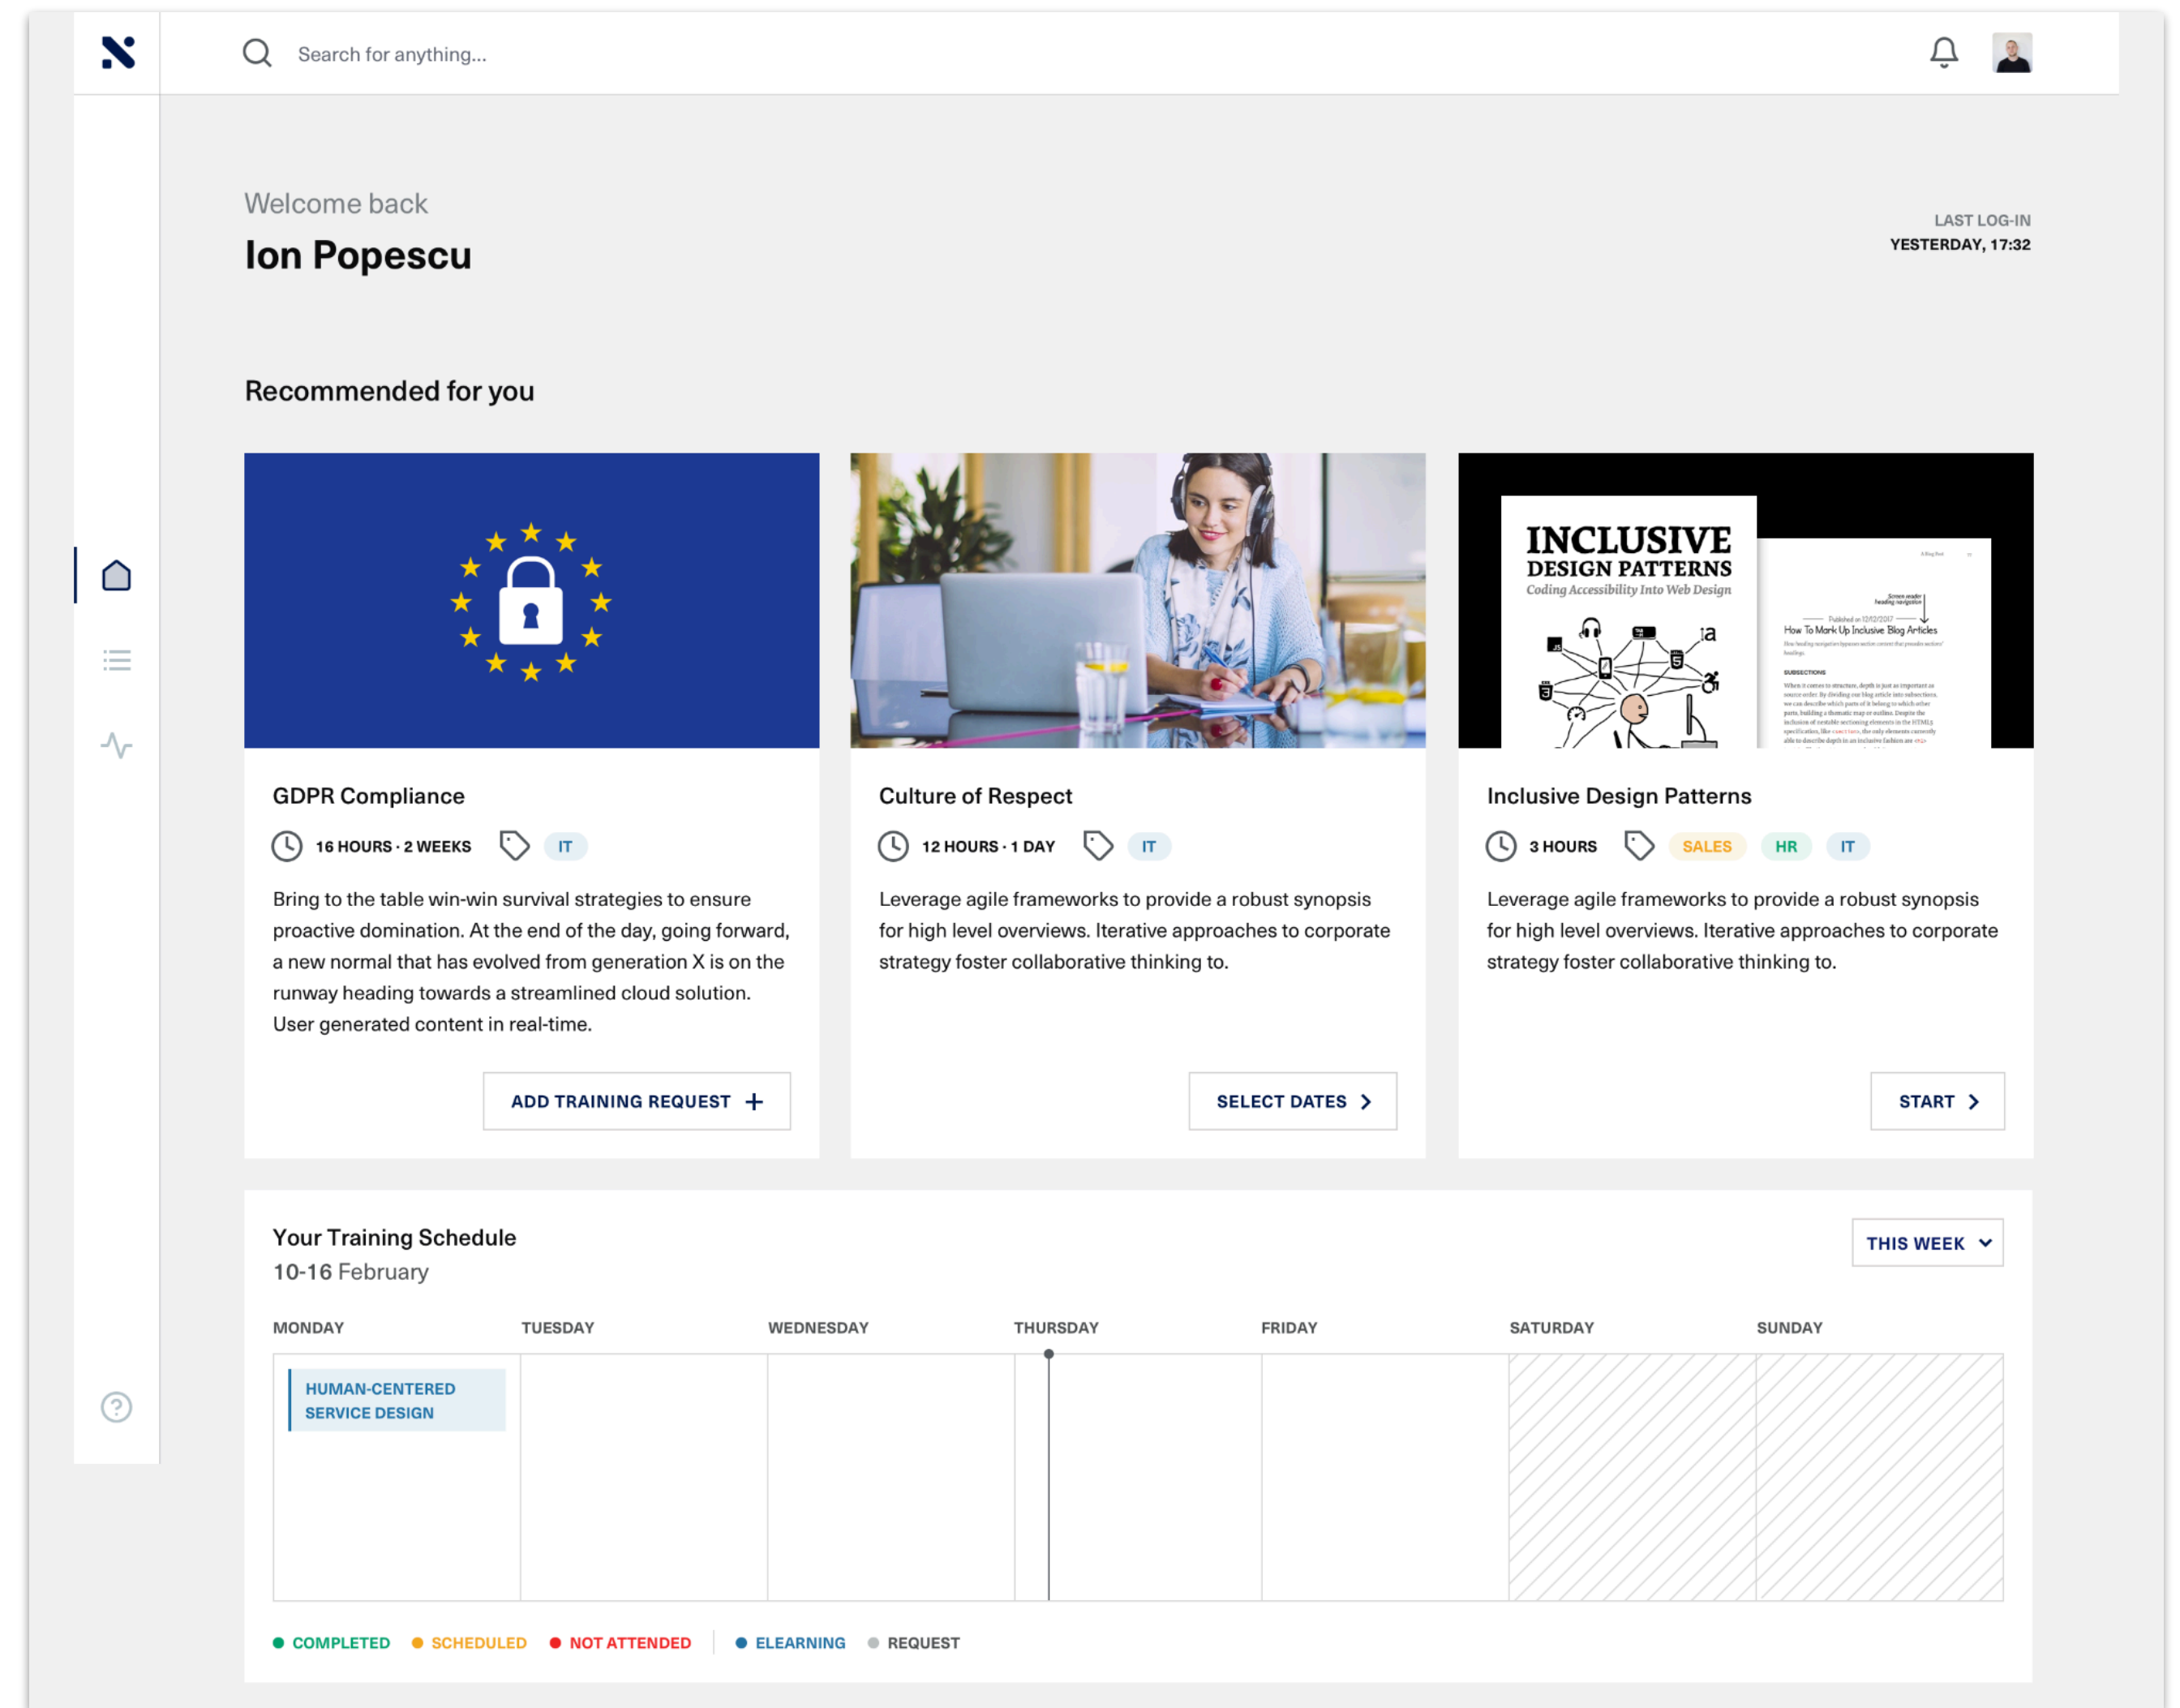

Techstars Startup: Nifty Learning

Nifty Learning provides an enterprise learning management platform used by Fortune 5000 companies and fast-growing startups.

With the platform, learning and training development teams **improve learner experience, drive employee engagement and increase knowledge acquisition and retention.**

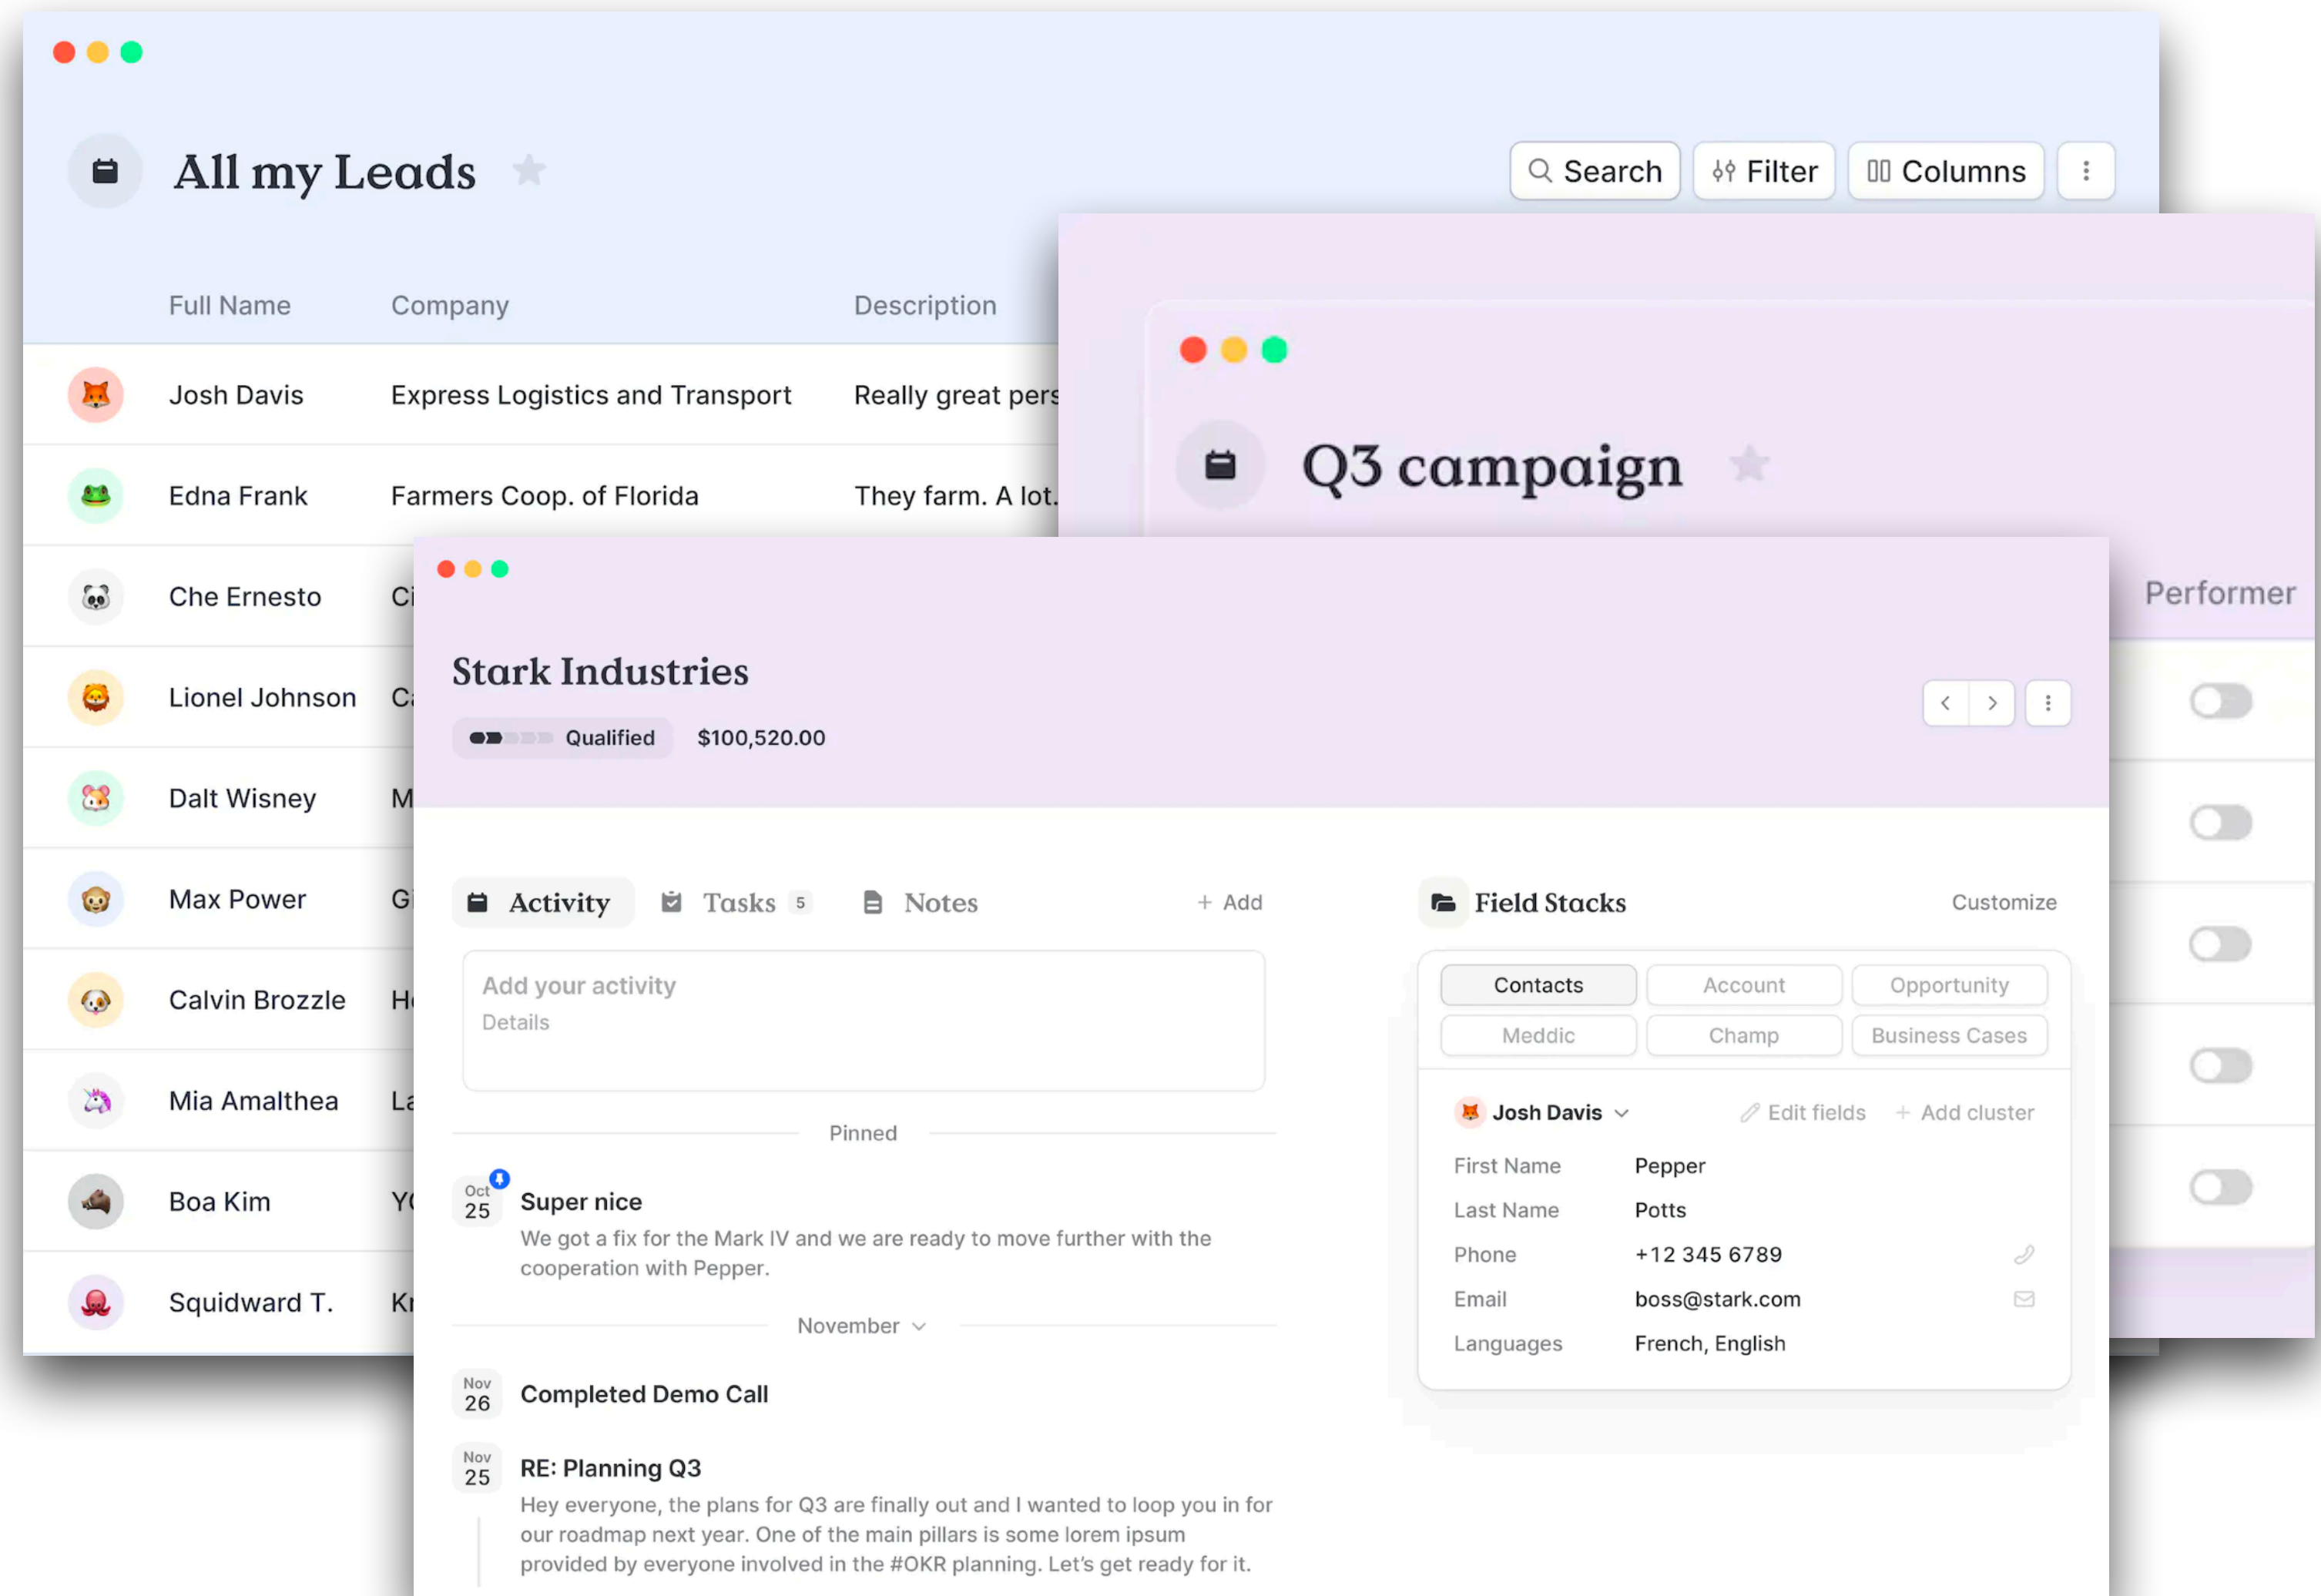

Y Combinator Startup: **Laserfocus**

Laserfocus is a YC company that provides a 100x better experience for the Salesforce CRM users.

With Laserfocus you organize your tasks, emails, events, notes, and Salesforce updates within one interface.

Other Projects: Microsoft, eMAG, Cloudbase, Openstack

Worked on some Microsoft projects while I was a Web Engineer at Cloudbase. Mainly involved in management and administration of automation infrastructures

Built a custom web CMS used for company-wide upselling programs such as internal mentoring, coaching, and functional training academies.

Plugins and component development for the OpenStack Horizon project.

Development of web services in multiple projects.
